

Bike Wash Station

- Designed for indoor or outdoor installation
- Vandal resistant hose and nozzle with stainless steel fittings
- HVLC (High Velocity Low Consumption) nozzle optimized for strong cleaning power without damaging bicycle bearings while also minimizing water usage
- Vandal proof auto shut off water valve prevents water waste
- Cleaning brushes attached by stainless steel cable prevent theft
- Requires municipal water and sanitary drain or dry well hookup
- Optional coin operated timer box
- System is compliant with ADA, EPA, and Public Law 111-380 (No Lead) requirements

Specifications

Temperature Range

Imperial 32 to 100° F
Metric 0 to 43° C

Construction

Material Laser cut steel, CNC machined stainless steel

Installation Options

Surface mount
Embedment

Cleaning Tools Included

Water hose
Brushes for drivetrain, frame, wheels, and general scubbing

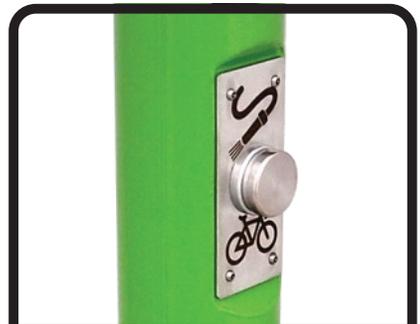

Dimensions & Weight

Imperial 12" W x 72" H x 12" D;
48 lbs
Metric 31 W x 183 H x 31cm D;
21.8 kg

Security Rating

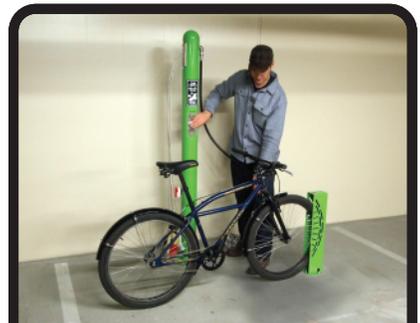

Patent Pending

Vandal-proof water auto shutoff

Attached brushes for full bike cleaning

Optimized water jet for bike washing
